

RAJU RANJAN KUMAR

Frontend Developer | React.js & Angular

+91 6202975094 • Delhi, India • rajuranjansimari110@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience designing and building scalable, high-performance web applications using React.js and Angular. Skilled in developing enterprise dashboards, real-time systems, and complex role-based workflow platforms, with a strong focus on clean architecture, reusable component design, and end-to-end delivery, including CI/CD pipeline setup and cloud server deployment.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript
- Frontend Development:** React.js, Angular, HTML5, CSS3
- UI Frameworks & Libraries:** Bootstrap, Tailwind CSS, Material-UI, PrimeNG, React Charts
- State Management:** Redux, NgRx
- APIs & Integration:** RESTful API integration, real-time data handling
- DevOps & Tools:** Git, GitHub, GitLab, Azure DevOps, CI/CD pipelines, IIS server configuration

PROFESSIONAL EXPERIENCE

Frontend Developer (React & Angular)

CodeAegis Pvt Ltd | Noida | Feb 2022 – Present

- Built and maintained scalable, responsive web applications using Angular and React across multiple enterprise-grade client projects.
- Designed reusable, modular UI components and shared libraries, streamlining development workflows and reducing repetitive effort across project teams.
- Implemented centralized state management with NgRx and Redux to ensure predictable, maintainable data flow in complex, multi-role applications.
- Improved application performance through lazy loading, optimized change detection, and efficient rendering strategies.
- Integrated REST APIs and real-time features to power dynamic, data-driven user experiences.
- Set up and managed CI/CD pipelines and configured IIS servers on Azure DevOps, streamlining build and release cycles for client deployments.

PROJECTS

Springup Solutions – Ticket to Work | Angular | Client Project | Current

- Contributing to Springup Solutions, a US-based career support platform empowering job seekers with guidance, tools, and resources for resume building, interview prep, and job search — specifically working on the Ticket to Work program, a role-based (RBAC) workflow connecting people with disabilities to employment opportunities, spanning Career Coach, Operations Manager, and Job Search Assistant (JSA) roles.
- Developed the core lead-to-placement workflow: lead creation and profile completion by the Career Coach, eligibility verification by the Operations Manager, progression through the Individual Work Plan (IWP) module, dual-party e-signature, and conversion to Ticket Holder status.
- Built the Job Search Assistance (JSA) module enabling job matching, search completion tracking, and hand-off of curated job listings back to the Career Coach for the Ticket Holder.
- Implemented Ticket Holder account provisioning, enabling converted candidates to log in independently and apply directly to matched job listings.
- Developed responsive UI in Angular and integrated REST APIs across multiple role-specific modules to support the end-to-end workflow.
- Set up a new IIS server and configured a CI/CD pipeline in Azure DevOps to automate builds and deployments for the project.

Happy Ride – Transportation Network Service Platform | React | USA | 1 Year

- Contributed to Happy Ride, a multi-service ride-booking platform built for Happy Rider Inc., transforming a decade of offline transportation operations into a scalable, digital-first mobile and web experience.
- Built UI supporting multi-service booking, including single rides, designated driver service, pet-friendly rides, and delivery services.
- Implemented real-time ride tracking with live notifications for a seamless, transparent booking experience.
- Integrated a secure payment gateway to support safe, automated digital transactions.
- **Admin Panel:** Built a scalable admin dashboard for driver, fleet, and booking management to support day-to-day operations.

Thoolie – Smart Legal CRM for Creative Professionals | React | USA | 1 Year

- Contributed to Thoolie, a legal CRM platform built for lawyers, entertainment professionals, and creative businesses to simplify contract management, collaboration, and compliance.
- Built UI for effortless document automation, enabling contract creation, editing, and e-signature using smart, attorney-backed templates.
- Implemented collaboration features including built-in messaging, version control, and a centralized client/project management dashboard.
- Contributed to the smart billing and payments module, supporting automated invoicing and secure payment tracking.
- Supported a platform that achieved a 60% reduction in manual contract preparation time through streamlined, role-based workflows.

Qootuma – Crowd-Shipping & International Delivery App | React | Kenya | 3 Months

- Contributed to Qootuma, a mobile app connecting travelers with people needing international shipping, enabling faster and more reliable delivery while travelers earn along the way.
- Built responsive UI supporting the traveler-sender matching and delivery request experience across Android, iOS, and Web.
- **Admin Panel:** Contributed to admin tools for managing users, delivery requests, payments, and platform operations.

Locksmith Hub – On-Demand Locksmith Service Platform | React | USA | 4 Months

- Contributed to Locksmith Hub, a nationwide platform connecting individuals with skilled, verified locksmith professionals for lockouts, repairs, and security upgrades, backed by 24/7 support.
- Built real-time locksmith search, instant booking, and in-app messaging for quick, reliable service requests.
- Implemented push notifications for service updates and promotional offers.
- **Admin Panel:** Contributed to admin tools for managing bookings, service categories, pricing, and verified professionals nationwide.

EDUCATION

Bachelor of Computer Applications (BCA) – Subharti University, Meerut

August 2019 – July 2022

CERTIFICATION

HTML5 & CSS3 – Pirple.com (September 2021)
